

## Who is Central Logic?

Managing patient transfers is a life-saving endeavor. Central Logic is a pioneer in the space and was founded in 2005 solely to support this mission. Our flexible, purpose-built solutions provide superior, real-time visibility and unmatched business intelligence to optimize the operations of health system transfer centers. Clients count on Central Logic to deliver strong growth, find new ways to improve patient outcomes and make their operations more effective.

## What is Central Logic On Call Scheduling®?

Our SaaS-based on-call scheduling technology combines and distributes calendars and schedules automatically, and seamlessly integrates with Central Logic Transfer Center® to provide the most robust solution in the marketplace. Health systems utilizing Central Logic On Call Scheduling® achieve measurable accuracy and insight into critical on-call information which saves time, money and improves care.

## Why is Central Logic On Call Scheduling® Needed?

Central Logic On Call Scheduling® streamlines a hospital call center productivity and accuracy by updating all on call and scheduling information, as it occurs. Call centers are often the central drop zone for hundreds of monthly paper schedules that must be filtered, collated, and maintained as schedules change, health systems that use Central Logic On Call Scheduling®

achieve measurable accuracy and insight into critical on-call information to help make better clinical and business decisions through real-time visibility and accessibility by the Transfer Center.

## How Can Central Logic On Call Scheduling® Work for your Health System?

Central Logic On Call Scheduling® integrates seamlessly with Central Logic Transfer Center® and any other system. Our solution, centralizes physician and provider scheduling and calendar data making it visible to the entire hospital. The ability to access on call data in real time ensures that a transfer center is able to contact the right physician the first time, resulting in the best care for the patient. All data gathered becomes a part of a longitudinal record, providing valuable data and metrics through a variety of customizable and real-time, actionable reports allowing for enhanced schedule accuracy and recaptured monthly staff hours.

## Operational Challenge and the Central Logic On Call Scheduling® Solution

Operational Challenges	Central Logic Advanced Reporting® Solution
 Data is limited and lacking effective reports and dashboards	Intuitive out-of-the-box reports and dashboards spanning multiple audiences and use cases.
 Different people in the hospital need visibility to different information	Visuals are designed to address the needs to various audiences from the c-suite to the front-line worker.
 Managing data is not my focus	Data from a variety of sources is captured, stored and presented into meaningful action-oriented information.
 Current reports don't give insight into challenges and opportunities	Best practice process and outcomes are used to create visually compelling "infographic" style visualizations that emphasize important operational opportunities.

**Enhances scheduling accuracy by up to 30%**

**Recaptures an average of 125+ staff hours per month**

**View any scheduling changes as they occur**
